StayAwayArea (2021)

ADVANTAGES

✓ Making hidden shoals visible derived from satellite images

✓ Covering areas with CATZOC worse than A2

✓ Exclusive service by ChartWorld

- Available for the Philippines, Indonesian, and Caribbean sea. More to come.
- Risk mitigation tool for cases where your vessels need to deviate from the main traffic lines
- Delivered in real-time via the ChartWorld NavCloud service
- ECDIS alarms will be triggered if vessels approach potentially unsafe areas

CIO+ NoGo
Automated outline of dangerous areas for the voyage

Without NoGo

Berthing
